Letterpress Young Reader Interviews

An Interview with Angad

Q1. What are your earliest memories of reading books – do you have a particular book you remember from that time?

I had a lot of books about ships and machines of all kinds when I was young because I really liked them. I also remember one book about football jokes that my uncle gave to me as a present – I've still got it and look at it sometimes.

Q2. What are your favourite kinds of books now?

I enjoy mostly anime and Manga books, especially ones that are about adventures. My favourite is Dragon Ball Vol 2, which I have loved ever since my cousin showed it to me when I was about six. My favourite character is Freezer who is really cool because he battled all of the gang successfully with only his first transformation! There is even a show and I am currently watching all the episodes online as well because I like the series so much.

Q3. Have you got a favourite author (or two)

I guess it would be Akira Toriyama who is the author of Dragon Ball and is a very famous Japanese manga author and artist.

Q4. How often do you read? Is there a favourite time when you like reading best?

I often read books in my spare time at home, but not so much at school as I am usually finishing off work that needs to be done. I like to read in the evening, usually in my bed before I brush my teeth.

Q5. Are you hoping to build a book collection? How many have you got and what's your prized possession?

I do have some books but I mostly like reading on my ipad. I'm not sure why I prefer doing that but I find that I sometimes blank out and lose concentration reading a book whereas it feels different reading on the ipad. At a rough estimate I think that I own about six books but there are loads more in my classroom and in the school library of course.
